Imaging Centre

HISTORY: 51 year old female with dense breasts for routine mammogram + ABUS. MMG aug 2021-normal ( apart from dense breasts ). No new breast concerns. Please R/O interval change.

**BILATERAL SCREENING MAMMOGRAPHY WITH TOMOSYNTHESIS**

**Family History:** No personal or family history of breast cancer.

**Findings:**

There are scattered areas of fibroglandular density (ACR category B).

No worrisome focal mass, architectural distortion or suspicious calcifications.

**IMPRESSION:** No evidence of malignancy. No adverse change since 2015.

**BI-RADS: 1: Negative.**

**Recommendation(s):** Screening mammography recommended in 1-2 years.
