Jillian Higgs

Indication: 1-year screening mammogram. Bilateral breast implants.

Reference study: Previous imaging including the mammogram from the 10, 2022.

Findings:

Both breasts were imaged with standard and pushed back views.

The breast parenchyma is heterogeneously dense, category C. No worrisome regions of architectural distortion, suspicious clusters of suspicious calcifications, or abnormal mass lesions are identified.

Impression:

Stable mammogram. Mammographically negative for malignancy.

Cynthia Theriault, MD, FRCPC
